

# Black Box Testing Defect Log

Defect No.	Defect Description	Defect Severity (1 - 5)	Test Case No. OR Description
1	When user presses “change password”, the app logs out the user.	2	9
2	Users are able to create new training list with duplicate exercises while they should not	1	12
3	When the user inputs the password twice upon registering, if they are different passwords the system does not output any error message	5	3
4	User is not able to login with their google account. It redirects you to the login page	3	7
5	User is not able to login with Facebook. User receives a development stage error when trying to sign in with Facebook	3	8
6	User is not required to enter their name when they register. It is specified that they must enter a name.	2	3
7	User is not required to input a username upon registering even though it is mandatory	5	3
8	User is not required to input a password upon registering even though it is mandatory	5	3
9	User is able to change password when giving the wrong original password.	5	10
10	User is able to change their password even though they did not input the new password correctly twice.	5	10

11	User is able to create empty exercise lists when they should not be allowed to	1	12
12	The timer when tracking a workout within a list is stuck at 0:00	3	When the user tracks a workout within a list, the timer does not visually update but when finishing the workout, it records the correct time.
13	When the user shares their workout statistics, the numbers being shared are incorrect.	3	When you share your statistics for a list, the numbers being shared are in minutes when the actual workout took seconds.
14	When the user goes to their results/graph page, the total time spent is incorrect.	4	The total time shows 10 minutes when the actual time spent was seconds.
15	The graph does not show any progress.	4	The graphs are left blank when they should have the plotted data.
16	The total calories shown in the results page is incorrect	3	The total calories shown in the results interface is different from the total calories burned in exercise interface.
17	The percentage complete shown in the results page is incorrect	3	The percentage completion shown was roughly 1% in the other results page but in the results page it shows 0.
18	Deleting account redirects the user to the main page rather than log them out.	4	17
19	Option to create a new exercise in the training list does not appear	4	19
20	Option to delete an existing exercise from a training list does not appear	2	21
21	When the user deletes the last exercise on the list, the list is empty and does not get deleted	2	22
22	When the user deletes their	3	During the same session without

	account, registers a new account and tries to create a list, the list does not appear		closing the app, if the user deletes their account and creates a new account, the user will not be able view any new lists they create.
23	When the user is tracking a workout, if the user presses start and then presses finish it does not record the time duration	4	26
24	When the user logs in and presses the default back button on the phone, they are redirected to the login page when they shouldn't be	3	The user should be taken to the previous visited page when the back button is pressed.
25	When the user deletes their account, their account is not deleted as they are still able to login with it.	4	The user should be signed out after deleting his/her account. All data should be deleted.
