High Order Testing
Defect Log

Defect No.	Defect Description	Defect Severity	Type of Higher-Order Testing	Test Case No. OR Description
1	User is able to change their password even though they did not input the new password correctly twice.When user presses "change password", the app logs out the user.	2	Usability Testing	9
2	Users are able to create new training list with duplicate exercises while they should not	1	Usability Testing	12
3	When the user inputs the password twice upon registering, if they are different passwords the system does not output any error message	5	Security Testing	3
4	User is not able to login with their google account. It redirects you to the login page	3	Usability	7
5	User is not able to login with Facebook. User receives a development stage error when trying to sign in with Facebook	3	Usability Testing	8
6	User is not required to input a password upon registering even though it is mandatory	5	Security Testing	3
7	User is able to change their password even though they did not	4	Security Testing	10

	input the new password correctly twice.			
8	The timer when tracking a workout within a list is stuck at 0:00	3	Usability Testing	When the user tracks a workout within a list, the timer does not visually update but when finishing the workout, it records the correct time.
9	Deleting account redirects the user to the main page rather than log them out.	4	Security Testing	17
10	When the user deletes their account, registers a new account and tries to create a list, the list does not appear	3	Performance Testing	During the same session without closing the app, if the user deletes their account and creates a new account, the user will not be able view any new lists they create.
11	When the user logs in and presses the default back button on the phone, they are redirected to the login page when they shouldn't be	3	Usability Testing	The user should be taken to the previous visited page when the back button is pressed.
12	When the user deletes their account, their account is not deleted as they are still able to login with it.	4	Security Testing	The user should be signed out after deleting his/her account. All data should be deleted.
13	When the user logs onto their account from a different device, the app says the username is not	2	Performance Testing	Logging onto a different device with a registered username does not work. The account

	registered and fails to login			registered information and statistics appears to be stored locally on the phone not via through a database.
